

Witek Mikołajczak

Fullstack Developer, Poznań

About me:

- 4+ years of development experience
- In my free time, I read books and go hiking in the mountains.
- My experience spans a wide range of projects — from e-commerce platforms to mobile applications and decentralized identity (SSI) solutions.
- I build intuitive, scalable interfaces that balance user needs, business goals, and technical constraints. I value clear communication and strong team collaboration.

Experience

• 05.2024 - Present

Fullstack Developer, Empeiria

I develop solutions in the field of decentralized identity (SSI), building systems for issuing and verifying credentials integrated with blockchain, along with a wallet application for their management. I create web applications and npm packages using TypeScript, ExpressJS, and NestJS, implementing advanced cryptographic mechanisms.

• 03.2023 - 08.2024

Frontend developer, CodeB, Poznań

As a Frontend Developer, I developed web and mobile applications using React, React Native, and Next.js, including integrating face analysis in SensusAI and modernizing the HomeProfit app. I also created the CupioAI app for stress management and improved the modniewoknie.pl service by updating Ruby on Rails and optimizing the backend.

• 06.2022 - 02.2023

Junior Fullstack Developer, e-ux.pro, Poznań

As a Fullstack Developer, I created web and mobile applications, including an employee verification system with LinkedIn integration and the PaliPali construction material ordering app. I worked with technologies like React, Redux, TypeScript, Node.js, GraphQL, and Parse-server, developing both the backend and frontend, as well as implementing automated tests.

• 04.2022 - 06.2022

Frontend developer, BUSBUS sp. z o.o., Poznań

I created custom HTML templates and engaging animations using CSS, JavaScript, and jQuery, focusing on intuitive UX/UI. I optimized the frontend for performance and scalability, applying best programming practices.

Education

• Present

Computer Science, WSB Merito University, Poznań

• 09.2017 - 06.2021

IT Technician, Zespół Szkół Komunikacji im. Hipolita Cegielskiego

Tools

React/Nextjs

React Native/Expo

Typescript

Html/Css/Tailwind

Cypress/Jest

Rest Api

Expressjs/Nestjs

Jira

Windsurf/CursorAI

Skills

English Language

Development of Self-Sovereign Identity (SSI) solutions and decentralized identity systems

Usability Testing

Programming in TypeScript (ExpressJS, NestJS)

Blockchain integration with credential systems

Creating npm libraries/packages

Implementation of advanced cryptographic solutions (e.g., digital signatures, encryption)

Developing web applications and servers

Implementing secure authentication and authorization mechanisms

Testing and debugging backend applications

Working with credential wallets

Designing and optimizing APIs
